FOR IMMEDIATE RELEASE

REI Announces New Physical Search Kit

Start every physical inspection with the confidence you have what you need.

Cookeville, TN July 15, 2024 - The new Physical Search Kit (PSK) from REI ensures you have what you need to successfully perform the physical search phase of a sweep, saving time and improving results. The Physical Search Kit is a portable, compact set of equipment, tools and supplies for conducting TSCM (Technical Surveillance Counter Measure) and other types of physical inspections.

The Physical Search Kit is ideal for discrete searches of conference rooms, hotel rooms, offices, and sensitive areas to find hidden electronics, illicit surveillance devices, or other forms of contraband. Custom foam layers help neatly organize contents of the PSK into a convenient, easy to transport hard-shell travel case, weighing approximately 30 lbs/13.6kg. Contents of the kit include:

- Articulating bore scope
- Wireless inspection camera
- Infrared detecting mini-monocular
- Digital distance meter
- Digital multi-meter
- Stud finder/imager
- Cordless screw driver with bits
- White/UV flashlight
- Hand tools (wrenches, pliers, sockets, screwdrivers, wire cutters, crimper)
- Inspection tools (headlamp, telescoping inspection mirror, illuminated loupe)
- Evidence protection (Faraday bag, evidence bags, security seals)
- Site prep and restore (mini vacuum cleaner, repair kits, shoe covers, tapes and epoxies)
- Safety products (first-aid kit, safety glasses)
- Over 50 items

PSK is an efficient, portable, and durable system for any physical investigation. Case specifications and more details are available on the REI website. For pricing, contact sales@reiusa.net.
