

NEW MESA® 18 GHz Downconverter Antenna

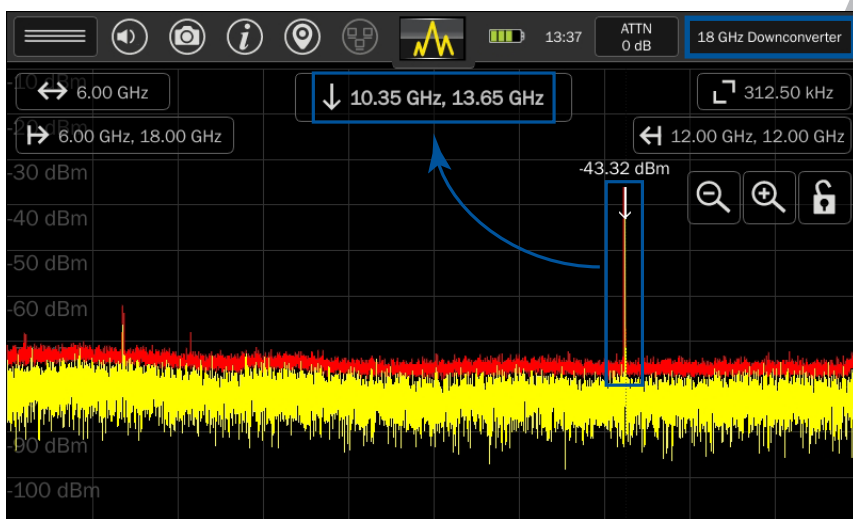

The MESA® 18GHz Downconverter antenna extends the MESA® frequency range to 18GHz. It is directionally sensitive for locating higher frequency transmitters.

Frequency Range: 500MHz to 18GHz

The 18GHz Downconverter antenna operates in 2 ranges:

- 500MHz to 6GHz
- 6 to 18GHz

The 6-18GHz range displays as two frequency spans superimposed on the same screen; 6-12GHz from left to right and 12-18GHz from right to left. In the example below, the outlined signal is either 10.37GHz or 13.65GHz.

6 to 12GHz reads left to right

12 to 18GHz folds over, reads right to left

The 18GHz Downconverter Antenna Kit is sold separately and can replace the 12GHz antenna in the MESA® 2.0 case foam. The Kit includes:

- 18GHz Downconverter Antenna
- QMA cable
- User Guide
